## The Inquiry Model Asking and Answering Your Own Questions

Throughout our time together we have used the Inquiry Model to investigate topics of interest and topics we wanted to learn more about. This model has helped us to develop research worthy questions and find valuable information using scholarly sources. We have learned

Connect

how to cite our sources and give credit for the information we found. After finding information and answering our own questions, we have reflected on our learning before sharing it with others in our learning community!

The Inquiry Model "Hyperdoc" will guide you to conduct your own research using the steps we have used in our Information Literacy classes.
